Williams Pre-Stressing / Post Tensioning Systems consist of high tensile steel bars available in five diameters from 1" (26 mm) to 3" (75 mm) with guaranteed tensile strengths to 969 kips (4311 kN). They are provided with cold rolled threads over all or a portion of the bar's length. All tension components for the systems are designed to develop 100% of the bar strength. All components of the systems are designed and manufactured in the United States. Williams All-Thread-Bar systems have been field proven around the world.
