Errata

In the article, “Gilman Drive Overcrossing at the University of California San Diego,” in the Summer 2019 issue of ASPIRE®, on page 20, right-hand column, the first full sentence should read, “The cable naturally adapts to the funicular shape as loads are applied. Under self-weight or other uniform gravity loads, it takes the shape of a catenary and all sections of the cable are in direct tension, with no shear or bending.” We regret this error.
